

PULL IN PLACE ECOLINER

Introducing EcoLiner from **TRENCHLESS SUPPLIES & EQUIPMENT**

Offering a wide range of equipment, supplies and consumables to plumbing, clearing and relining contractors from start to finish, the TSE team provide around the clock support and training and are on hand for your project requirements.

Australian owned and operated, all ECO bladder components and felt liners are manufactured locally at our manufacturing facility in Melbourne. We supply complete lining components from felts, resins, rubber bladders, vinyl bladders, fixtures, air compressors and air fittings.

To compliment our locally manufactured products, we also source the best material and equipment globally – we only supply the best the world offers.

TSE continually strive to deliver unsurpassed service and technical support to our customers.

ONE SYSTEM INFINITE SOLUTIONS

Drain, Conduit & Pipe Lining

CUSTOMER SUPPORT

MANUFACTURED IN AUSTRALIA

BEST, TESTED MATERIALS

50 YEAR
SERVICE LIFE EXPECTANCY

NO JOB TOO BIG, NO JOB TOO SMALL

Bladder components and spare parts are available Australia wide with a fast turnaround and delivery.

TSE Fabricate EcoLiner out of a needle woven polyester fabric and produce custom required lengths, thickness, or diameter ranging from DN40mm to DN1800mm.

Unique internal pipes sizes are catered for.

Flow-through bladder parts are available on request.

The curing period of our resins is adjustable with the use of our slow, fast and ultra-fast resin range.

1050MM X 7500MM ECOLINER INSTALLED
IN A CONCRETE STORMWATER CULVERT

ECO LINER COMPONENTS AVAILABLE FROM TSE

**ALL BLADDERS ARE CONSTRUCTED BY INSTALLERS
WITH TSE COMPONENTS**

BECOME TRENCHLESS TODAY

Complete trench-less no dig solution.

Can repair sewer & stormwater pipes of any material.

A structural solution for sewer pipe, trade waste pipes and vertical stacks. DN100 - DN225

Suitable for junctions, bends and transitions in diameter.

Ideal for sealing the inside of large-bore drainage systems to combat I & I issues.

Reduce the risk of damage to other services caused by excavation.

Less mess, less effort! and a fast economical return to service.
